

Pelletized activated Carbon inside  
50-65 mm carbon bed

The pelletized activated carbon CKV 3 & 4 mm we use, is provided by our trustworthy partners and it assures 100% air purification for our Can Original filters, when used with the adequate fan capacity.

**Can Original is a really heavy duty filter that is very unique in this market. For plant strains that are particularly strong in odour, the Can Original filter is the only one to use.**

Most activated carbon per cm<sup>2</sup> for better adsorption

Original mesh pattern for efficient airflow

Multi-layer pre-filter for better protection of the carbon

- +** Premium filter with minimum 30 months of life
- +** Thickest pelletized carbon bed in the industry
- +** Pelletized carbon CKV 3 & 4 mm

Optimum conditions of use:  
Max. Temperature 80°C  
Max. Humidity 70%

*Filter life is quite variable but with reasonable grow conditions and regular prefilter exchange, a minimum 30 months of life could be expected from your Can-Original filter.*
